

ASE5300-DS

SiPass®
integrated

Data synchronizer tool

Automatic exchange of cardholder information

-
- **Enables easy, automatic exchange of cardholder information between SiPass integrated and third-party applications**
 - **Both data import and export is possible**
 - **Easy configuration**

The Data Synchronizer is a licensable tool for SiPass integrated that allows the user to share cardholder data with a third-party application. This can also be used in conjunction with the import/export tool that is freely available in SiPass integrated.

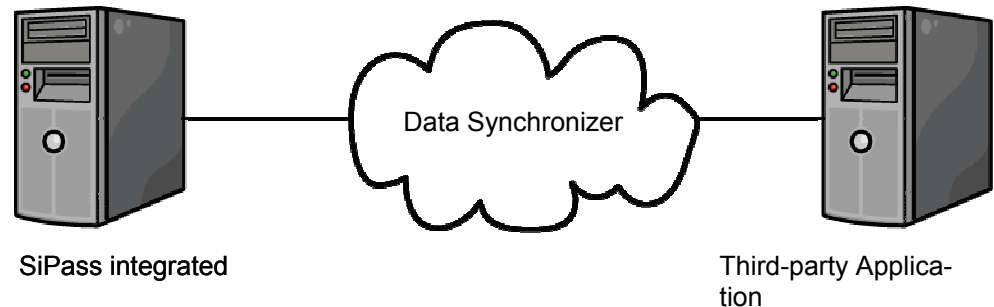

Features

- **Import to database fields**
- **Export from database fields**
- **Task scheduling**
- **File locking with timeout**

The Data Synchronizer allows scheduled import of data to the SiPass integrated database.

A number of advantages are provided by this tool including:

- It makes it possible for the user to make batch changes to cardholder records in SiPass integrated without the tedious process of creating multiple records through the SiPass integrated GUI.
- It provides a simple method to update the SiPass integrated database regularly if the cardholder data is managed by an application other than SiPass integrated (like a human resources program)
- If upgrading from another access control system, it allows the user to initialize the database.
- A new .INI file that is created by the tool when it is first run on a system allows the user to reproduce all the data on another system. Unlike older versions of the tool, the user text mappings no longer need to be reset.
- With this tool, it is possible for the user to add as many cardholder fields as required to the 'Import file' field list.

Technical data

Functions	Initialize, Add, Update, Delete & Complete import of records.
Import Operation Modes	Verify: Prompts operator for decisions. Automatic: Only possible errors are displayed. Quiet: No operator intervention.

System requirements

One of the following core software packages is required:

Type	Part no	Designation
ASL5000-SE	6FL7820-8AA10	SiPass integrated Standard
ASL5000-OA	6FL7820-8AA20	SiPass integrated Optima

Details for ordering

To order the SiPass integrated software extensions, you must first complete a software license order form. Please contact your SiPass integrated supplier for further information.

Type	Part no	Designation
ASE5300-DS	6FL7820-8AE14	Data synchronizer tool
